

**AMENDMENTS TO THE CLAIMS**

**1. (Withdrawn)** An ameliorant for improving the movement of the digestive tract, comprising as an active ingredient 4-amino-5-chloro-2-methoxy-N-[(2S,4S)-2-hydroxymethyl-4-pyrrolidinyl]benzamide or an acid addition salt thereof which has high binding affinity for a serotonin receptor 4 (5HT<sub>4</sub>) and does not cause arteritis and thrombus formation.

**2. (Withdrawn)** A medicinal composition for improving the movement of the digestive tract, comprising as an active ingredient 4-amino-5-chloro-2-methoxy-N-[(2S,4S)-2-hydroxymethyl-4-pyrrolidinyl]benzamide or an acid addition salt thereof which has high binding affinity for a serotonin receptor 4 (5HT<sub>4</sub>) and does not cause arteritis and thrombus formation, and a pharmaceutically acceptable carrier.

**3. (Currently Amended)** A treating method for promoting the movement of the digestive tract, which consists of administering isolated and optically active 4-amino-5-chloro-2-methoxy-N-[(2S,4S)-2-hydroxymethyl-4-pyrrolidinyl]benzamide or an acid addition salt thereof which has high binding affinity for a serotonin receptor 4 (5HT<sub>4</sub>) and does not cause arteritis or thrombus formation, and optionally a pharmaceutically acceptable carrier.

**4. (Currently Amended)** A method for improving the movement of the digestive tract of a human or an animal while avoiding occurrence of arteritis, thrombus formation or encephalomalacia, which consists of administering isolated and optically active 4-amino-5-chloro-2-methoxy-N-[(2S,4S)-2-hydroxymethyl-4-pyrrolidinyl]benzamide or an acid addition salt thereof and optionally a pharmaceutically acceptable carrier to a human or a mammal.

**5. (Withdrawn)** 4-Amino-5-chloro-2-methoxy-N-[(2S,4S)-2-hydroxymethyl-4-pyrrolidinyl]benzamide or an acid addition salt thereof.

**6. (Withdrawn)** 4-Amino-5-chloro-2-methoxy-N-[(2S,4S)-2-hydroxymethyl-4-pyrrolidinyl]benzamide in which an amino group at position 4 or/and an amino group of the

pyrrolidinyl group is optionally protected, or an acid addition salt thereof.

**7. (Withdrawn)** A process for preparing 4-amino-5-chloro-2-methoxy-N- [(2S,4S)-2-hydroxymethyl-4-pyrrolidinyl]benzamide or an acid addition salt thereof, which comprises reacting 4-amino-5-chloro-2-methoxybenzoic acid having an optionally protected amino group, or a reactive derivative thereof with (2S,4S)-4-amino-N-acyl-2-hydroxymethylpyrrolidine to obtain 4-amino-5-chloro-2-methoxy-N-[(2S,4S)-1-acyl-2-hydroxymethyl-4-pyrrolidinyl]benzamide or an acid addition salt thereof, and eliminating a protecting group and the acyl group, when a protecting group is used in the acyl group.

**8. (Withdrawn)** (2S,4S)-4-amino-N-acyl-2-hydroxymethylpyrrolidine having an optionally protected amino group.

**9. (Withdrawn)** The compound according to claim 8, wherein a protecting group for an amino group is an acyl group, and the said acyl group and an acyl group of N-acyl are selected from formyl, acetyl, propionyl and benzoyl.

**10. (Withdrawn)** The compound according to claim 8, wherein the acyl group is acetyl.
